Sustainable Cable & Connectivity Installation

[End User Name] has committed to the goal of sustainability by installing the nCompass solution. This project has utilized nCompass for horizontal cabling, backbone cabling, desktop cabling and data center cabling. By using the nCompass solution [End User Name] qualifies for the contribution of various green building credits, imperatives and features.

The products installed on this project support more than 45 Credits, Imperatives, and Features from LEED v4 and v4.1, WELL 1.0 and 2.0, Living Building Challenge 3.1 and 4.0:

FEATURES:

- 35+ Health Product Declarations (HPDs)
- 144 Environmental Product Declarations (EPDs) & PEPs
- Declare labels, Red List Free products, and Living Product Challenge Certifications
- Lower Embodied Carbon & LEED v4.1 Action Plans for 35+ Products
- Zero Waste to Landfill Certification since 2014

BENEFITS:

- Contributes toward 1 point under the Material and Resources credit (MRc)
- Contributes toward 1 point under the Material and Resources credit (MRc) and contributes to WELL 1.0 & 2.0
- Contributes to the Materials Petal in Living Building Challenge 3.1 and 4.0 Projects, LEED v4 and v4.1 and WELL projects
- Contributes to 1 point under the Materials & Resources category in LEED v4 and v4.1
- Contributes to Circular Products Pilot Credit in LEED v4 & v4.1
